I've installed strace to investigate further:

```
hoefnix2:~# strace vzctl enter 60
...
clone(child_stack=0, flags=CLONE_CHILD_CLEARTID|CLONE_CHILD_SETTID|SIGCHLD,
child_tidptr=0x2b65860859d0) = 29577
close(3)                = 0
close(7)                = 0
close(9)                = 0
close(10)               = 0
read(8,
```

With bash 4.1 patchlevel 009 I get:

```
clone(child_stack=0, flags=CLONE_CHILD_CLEARTID|CLONE_CHILD_SETTID|SIGCHLD,
child_tidptr=0x2af2938ab9d0) = 2972
close(3)                = 0
close(7)                = 0
close(9)                = 0
close(10)               = 0
read(8, "", 4)          = 0
fstat(1, {st_mode=S_IFCHR|0620, st_rdev=makedev(136, 1), ...}) = 0
...
```

Hope that someone sees the problem and may be even a solution .
