From: Jacob Pan <jacob.jun.pan@linux.intel.com>

Fixing subject in cover letter, should be v4 instead of v3

Changelog:

v6: - remove check for duty ratio == 100 case  
v5: - improve error handling in duty ratio/ period writes  
- fix the logic to avoid kthread creation when ratio and  
period are invalid.  
- 100% frozen is not permitted in duty ratio set up

v4: - limit kthread creation only when valid duty ratio  
parameters are given.  
- changed period back to milisecond  
- consolidated paramter write functions

v3: - added documentation

v2:  
- use read\_u64/write\_u64 instead of string read/write  
- use period in second instead of ms  
- renamed duty\_ratio to duty\_ratio\_pct, be more specific  
- removed locking around period and duty\_ratio reads

Jacob Pan (1):  
cgroup/freezer: add per freezer duty ratio control
