Hi!

Thanks for the fast (especially on Sunday) and competent answer.

I found out with strace that pureftpd likes to set the following capabilities:

CHOWN DAC_READ_SEARCH SETGID SETUID NET_BIND_SERVICE NET_ADMIN SYS_CHROOT SYS_NICE CHOWN DAC_READ_SEARCH SETGID SETUID NET_BIND_SERVICE NET_ADMIN SYS_CHROOT SYS_NICE

I activated those via vzctl and it works perfectly now!

One thing I was thinking about. What about security when all those capabilities are set?

Christoph
