Hi!

After last upgrade (yestarday), after long war with bootup srv I run node and...

When node startup, all VPS on debian don't get network (of course centos work corect), but when I add from CP additional IP (1 per VPS), all go up. Next - reboot - and again I must remove/add IP's.

this is iptables -t nat -L && iptables -t filter -L && iptables -t mangle -L after 'action'.

Chain PREROUTING (policy ACCEPT)

target	prot	opt	source	destination
--------	------	-----	--------	-------------

Chain POSTROUTING (policy ACCEPT)

target	prot	opt	source	destination
--------	------	-----	--------	-------------

Chain OUTPUT (policy ACCEPT)

target	prot	opt	source	destination
--------	------	-----	--------	-------------

Chain INPUT (policy ACCEPT)

target	prot	opt	source	destination
--------	------	-----	--------	-------------

Chain FORWARD (policy ACCEPT)

target	prot	opt	source	destination
--------	------	-----	--------	-------------

Chain OUTPUT (policy ACCEPT)

target prot opt source destination

Chain POSTROUTING (policy ACCEPT)

target prot opt source destination

of course before action is this same, only without static.88-198-103-132 and static.88-198-103-134.

openvm reinstalled about 5 times (this same final)

Any solution?
