I installed virtualmin on my VPS and created a new virtualhost. I googled how to change the time and found

```
rm /etc/localtime
```

```
ln -s /usr/share/zoneinfo/US/Eastern /etc/localtime
```

Tried and failed

Strangely when I view any timezone file in the zoneinfo directory and the /etc/localtime file all I see is TZif2 is this okay ?

Is there any other way to change my timezone ?
