Subject: Re: Pureftpd and Linux capabilties Posted by dev on Mon, 03 Jul 2006 07:22:13 GMT View Forum Message <> Reply to Message

can you confirm please that CAP\_NET\_ADMIN is the one to blame? i.e. remove it and recheck

if it is CAP\_NET\_ADMIN then it is really buggy software :/ This capability is too powerfull to give it as is. So from security point of view, sure it is not good.
