Hello.

I have 1 Vps. I have OS - "centos-5-i386-hostinabox576", Disk Space - 100 Gb, Ram's - 2 Gb. On the VPS i have installed Shoutcast for my radio station.

After I write in putty root and password I took this error "-bash: fork: Cannot allocate memory"

The print with the error is here img585.imageshack.us/i/erorrg.png/

How can I solve this problem?

Please help me and Thnx
