Hello,

Question

I have a big node running several containers

Below the memory usages

What is important for performance

The Physical memory usage (88%)

Or the kernel+ applications (28%)

Has someone a explanation how to read this ?

Memory Usage

Type	Percent	Capacity	Free	Used	Size
------	---------	----------	------	------	------

Physical Memory	88%	2.74 GB	20.96 GB	23.71 GB	
-----------------	-----	---------	----------	----------	--

- Kernel + applications	28%	6.64 GB			
-------------------------	-----	---------	--	--	--

- Buffers	3%	837.63 MB			
-----------	----	-----------	--	--	--

- Cached	57%	13.51 GB			
----------	-----	----------	--	--	--

Disk Swap	0%	3.99 GB	8.21 MB	4.00 GB	
-----------	----	---------	---------	---------	--

Thanxs

Steffan
