Subject: Re: Weird IOwait raising using 028stab085.2 x86_64 and i686 kernel
Posted by meto on Fri, 01 Apr 2011 09:42:13 GMT

I also encountered IO problems and almost started replacing drives. Now I'm running 2.6.18-238.5.1.el5.028stab088.1 and it seams fine now. I think, that one of newer kernel should be pushed to stable to fix that issue.

Here you have munin graph from container:
