Subject: custom location for OS template

Hi!

Is there any way to specify a location for OS templates? The default one is written in /etc/vz/vz.conf as  
TEMPLATE=/vz/template

but I would like to have a possibility to specify the custom one e.g. with absolute path:  
\$ vzctl create --ostemplate /vz/tmp/centos-5-x86.tar.gz <CTID>

with corresponding value for OSTEMPLATE variable in VE config:  
OSTEMPLATE="/vz/tmp/centos-5-x86.tar.gz"

I think that way would provide more flexibility.

Should I submit feature request on that?

Thanks!  
Nikolay.
