Subject: Servers autorestarting
Posted by devonblzx on Thu, 28 Apr 2011 16:38:20 GMT

Any idea why this would happen?

I shut down a server, but if I don't disable it, it starts back up within a few seconds. It is becoming a pain for me. It doesn't look like any cronjob are installed for openvz and my servers never used to do this.

Thanks.
