Hi list,

I try to create a virtual network I use the information on the wiki
but I don't understand commands, could some explain me theses commands?

```
[host-node]# ifconfig vzbr0 0  
[host-node]# echo 1 > /proc/sys/net/ipv4/conf/vzbr0/forwarding  
[host-node]# echo 1 > /proc/sys/net/ipv4/conf/vzbr0/proxy_arp
```

Thanks you!

Rachid
