Subject: Re: openvz + 3ware RAID card Posted by nethubonline on Fri, 29 Apr 2011 10:10:39 GMT View Forum Message <> Reply to Message

just tested that if I run the RHEL original kernel, there is no any problem for 7 days

And confirmed that with openvz kernel, even adding "noapic all-generic-ide acpi=off pci=nommconf" does not help.

any one help or advise is appreciated
