---

I can't get OpenVPN Access Server to work for me also

Error:

```
Service deferred error: IPTablesServiceBase: failed to run iptables-restore [status=1]: ['FATAL:
Could not load /lib/modules/2.6.32-5-openvz-amd64/modules.dep: No such file or directory',
'iptables-restore: line 37 failed']:
```

```
python/context:37,internet/epollreactor:223,internet/posixbase:191,internet/process:260,internet/pr
ocess:762,internet/process:775,internet/_baseprocess:60,svc/pp:116,svc/svcnotify:26,internet/def
er:238,internet/defer:307,internet/defer:323,sagent/iptables:105,sagent/iptables:39,util/error:52,util/error:32
service failed to start due to unresolved dependencies: set(['user', 'iptables_openvpn'])
service failed to start due to unresolved dependencies: set(['iptables_openvpn'])
```

I modprobed tun etc, added the iptable entry's to the vz.conf file.

And my veth network device works.

Still getting above error when trying to start the server, can't figure it out.

I want the openvpn-as as it is free for 2 concurrent users and I like the fact that I don't need a client on the client side.

(I can just use the vpn by going to the website)

Does anyone have a suggestion on what I can try ?
