Subject: custom location for OS template Posted by knawnd on Tue, 03 May 2011 12:17:15 GMT

View Forum Message <> Reply to Message

Hi!

Almost a month ago (on April 4th) I had posted a message [1] to Discussion thread on OpenVZ forum but I still haven't got reply. So I am trying to ask in OpenVZ mail list.

----- start quotation -----

Is there any way to specify a location for os templates? The default one is written in /etc/vz/vz.conf as template=/vz/template

but I would like to have a possibility to specify the custom one e.g. with absolute path:

\$ vzctl create --ostemplate /vz/tmpl/centos-5-x86.tar.gz <CTID>

with corresponding value for ostemplate variable in VE config: ostemplate="/vz/tmpl/centos-5-x86.tar.gz"

I think that way would provide more flexibility.

Should I submit a feature request on that? ----- end quotation -----

Thanks! Nikolay.
