It should work, we have forward-ported all the features required by newer distros. More to say, latest vzctl (since 3.0.25) sets this on a per-CT basis, using the table from /etc/vz/osrelease.conf. If you run vzctl-3.0.25 or later, just add the following line to this file: debian-6.0 2.6.32 I will fix it in vzctl-3.0.26.3 soon. > Thanks > P.S.
