Subject: Re: openvz + 3ware RAID card
Posted by nethubonline on Mon, 09 May 2011 01:40:05 GMT

The Stig,

Thank you very much for your help.

I tested with RHEL6 and 2.6.32-042test011.1.x86_64 since 4 May 2011, the server does not occur any problem.

Since RHEL5 is not compatible with 3ware RAID card, I think I will use this kernel for production, if any problem persists I will update this post.
