Subject: Is SHM and mmap supported?
Posted by edekzkrainykredek on Tue, 10 May 2011 19:41:28 GMT

Hi,

I encounter problems when I try to run GStreamer and PulseAudio within OpenVZ container. I got errors like

shm_open() - function not implemented etc.

mmap()ing memory also fails.

Is SHM and mmap disabled in the OpenVZ kernel or maybe I am doing something wrong?
