Subject: Re: OpenVZ inside Linux-KVM
Posted by Ales on Wed, 11 May 2011 04:59:47 GMT

Hi and welcome!

Quote:. everything went smooth, except the network connection. I can access the openvz with ssh
(also instaled Hypervm to create the openvz vps etc)

So, what exactly is the problem? How is your network configured and what is the problem/error
you see?
