[root@test2 /]# yum
There was a problem importing one of the Python modules
required to run yum. The error leading to this problem was:

   No module named yum

Please install a package which provides this module, or
verify that the module is installed correctly.

It's possible that the above module doesn't match the
current version of Python, which is:
2.4.3 (#1, Mar 5 2011, 21:25:56)
[GCC 4.1.2 20080704 (Red Hat 4.1.2-50)]
