---

Hello guys.

I can't update to last vzctl.  
When I am doing yum update command it writes:

Error: Missing Dependency: vzeventmod is needed by package vzctl

I have been told that vzeventmod is in latest kernel. My kernel is  
2.6.9-023stab053.2-enterprise(latest one in repo). System - CentOS 4.9.  
Does anyone familiar with this situation?

Regards  
Anton
