aluputi wrote on Mon, 16 May 2011 08:21Hello!

I read the documentation but I'm still not sure about how to set container memory.

Thanks!

To set container memory, please check as :

```
=====
vzctl set 102 --vmguarpages 5130000:5140000 --save
```

```
vzctl set 105 --privvmpages 2G:3G --save
=====
```

vmguarpages : Guaranteed memory to VE

privvmpages : Maximum theoric memory available to VE (real available  
memory vmguarpages, right?)

Thanks
