Subject: vzmigrate patch: added --dst-path parameter

Hello,

Attached is modified vzmigrate that introduces --dst-path parameter:
--dst-path
Destination node disk path for the migrated container. By default the path will be the same.
Examples:
...
Migrate CT #101 to /vz4 path:
vzmigrate --dst-path=/vz4 101 foo.com

The sed expression probably supports some optimizations.

Inclusion of this patch in the official vzmigrate would be useful.
