
Subject: vzmigrate patch: added --dst-path parameter
Posted by [waverider](#) on Sun, 29 May 2011 20:26:33 GMT

Hello,

I'm reposting this as text message:

Here is the modified vzmigrate that introduces --dst-path parameter:

--dst-path

Destination node disk path for the migrated container. By default the path will be the same.

Examples:

...

Migrate CT #101 to /vz4 path:

```
vzmigrate --dst-path=/vz4 101 foo.com
```

<http://www.intovps.com/vzmigratext>

The sed expression probably supports some optimizations.

Inclusion of this patch in the official vzmigrate would be useful.

Regards,

Adrian Andreias, IntoVPS - <http://www.intovps.com>
