```
#> vzmigrate --online --keep-dst --remove-area no -v x.x.x.x 1000
Starting online migration of CT 1000 to x.x.x.x
OpenVZ is running...
  Loading /etc/vz/vz.conf and /etc/vz/conf/1000.conf files
  Check IPs on destination node:
Preparing remote node
  Copying config file
1000.conf
Name infoservice assigned
No changes in CT configuration, not saving
  Creating remote container root dir
  Creating remote container private dir
Initializing remote quota
  Quota init
  Turning remote quota on
Syncing private
file has vanished: "/vz/private/1000/tmp/#sql_5ed_0.MYD"
file has vanished: "/vz/private/1000/tmp/#sql_5ed_0.MYI"
rsync warning: some files vanished before they could be transferred (code 24) at main.c(1042)
