1. Do other CTs work fine (wrt networking) on the same system?
 2. What is the output of the following commands (inside your failing CT)?
`/sbin/ip r`
`/sbin/ip a`
`ifconfig -a`
`ls -l /etc/sysconfig/network-scripts/`
 3. Please show the contents of CT config file (i.e. `/etc/vz/conf/${CTID}.conf`)
-
