baldy wrote on Tue, 06 September 2011 14:12Hi there,

the latest 2.6.32 RHEL6 kernel wont work. I get alway a Kernel-Panic... Inside a VMware ESXi Server or on a dedicated server.

I use Centos 5.6 but i need to use vSwap

Is there any other way?

did you try to use the latest OVZ kernel on CentOS 6.0 or on ScientificLinux 6.1 ?
