Subject: Re: Tasks hanging cause node to reboot/stall
Posted by xakmak on Thu, 06 Oct 2011 08:24:10 GMT

I have the same problem.
Server reboot himself every 15-20 hours with kernel crash.
Fresh install of Centos6 on working with Centos5 OVZ server, seems 2.6.32 is not so stable yet.
I have submitted bugreport-
