Hi All!

vzctl set 100 --cpuunits 500 --cpus 1 --save does not working on debian squeeze HOST. when i login into VPS and

cat /proc/cpuinfo it shows 4 cores, 4 cores shows top too. can someone explain why?

I have all updated.
kernel "2.6.32-5-openvz-amd64" and vzctl 3.0.24

someone knows about that? please help!

Thanks

Davti Macharashvili
