Subject: Re: OS/app in the OpenVZ container
Posted by Kirill Korotaev on Thu, 10 Nov 2011 08:22:33 GMT

Yes, it's possible to run a single app in a container.
The easiest way is to let the startup scripts setup /proc, /sysfs and the rest of environment and
then specify in inittab or rc.X what to run on this particular runlevel.

However, for media player you may also need to run some of X parts, not just a media player
alone.

Thanks,
Kirill
