Hello List,

Im quit new to using openvz

Is there somewhere a list of settings

What I mean:

I have a node with 2 quad processors
96 GB of memory and big disks

I dont want to use vpsspli
but there are a lot of settings and I don't know what they all mean

I like to know how I can make a vps with say

256 MB memory
100 GB Disk
1 vcpu

And say

2048 mb memory
2 vcpu

Etc

Hope someone can help me to the right direction and understand my bad English : -)

Thanxs

Steffan
