aistis wrote on Mon, 10 July 2006 14:44Can you access your host system from inside VM? If so, we could look further

Yes from inside teh VE, i can access the host machine, and from teh host i can access teh vE. But not from outside the host..

Quote:
So you only cannot access VEs or the host system (OVZ) too?

THe vmware VM is a full fledged machine and is on a remote machine. i am logged into the VM through ssh. SO network on teh vm is very fine. From inside teh VM i can access teh VE. From inside teh VE, i can access teh VM.

But from outside, i can't access the VE.

i hope that's clear.

Thanks for your time.
