Subject: Re: OpenVZ CentOS 6 IP issues
Posted by fredericep on Tue, 29 Nov 2011 19:24:18 GMT

Hello,

from what I know your IP addresses shouldn't be attached to the HN.
You should add them to the container using vzctl set xxx --ipadd 1.2.3.4 --save.

Doing an ifconfig on the HN shouldn't give you the IPs of the container.

regards,

Frederic
