
Subject: [PATCH v7 08/10] Display current tcp failcnt in kmem cgroup

Posted by [Glauber Costa](#) on Tue, 29 Nov 2011 23:56:59 GMT

[View Forum Message](#) <> [Reply to Message](#)

This patch introduces kmem.tcp.failcnt file, living in the kmem_cgroup filesystem. Following the pattern in the other memcg resources, this file keeps a counter of how many times allocation failed due to limits being hit in this cgroup. The root cgroup will always show a failcnt of 0.
