aistis wrote on Mon, 10 July 2006 15:15oh. please check this:

cat /proc/sys/net/ipv4/ip_forward

if it is 0, set to 1 by issuing:

echo "1" > /proc/sys/net/ipv4/ip_forward

should do a trick for you.

Shit, i had forgotten that u need to enable forwarding. i changed teh sysctl.conf (i am using centos).

thanks a lot. that was really stupid of me. i keep forgetting that .
