Subject: Re: mysqld not running in all CT's Posted by plotinus on Mon, 05 Dec 2011 10:47:26 GMT View Forum Message <> Reply to Message

I've read lots of posts.

Some of they say "recompile kernel", some others "unload modules".

How can I know what is the right way to follow?

I can't identify where is the problem.

Total lost and becoming crazy.
