Hi,

Just saw there will a talk about openvz at FOSDEM:

http://fosdem.org/2012/schedule/event/hypervisors_openvz

If you want to share experience with OpenVZ, maybe people of this list can meet somewhere after the talk?

Best,

--

"In July 2005, after several failed attempts to legalise software patents in Europe, the patent establishment changed its strategy. Instead of explicitly seeking to sanction the patentability of software, they are now seeking to create a central European patent court, which would establish and enforce patentability rules in their favor, without any possibility of correction by competing courts or democratically elected legislators."
