it fixed using i386 version of glibc

```
[root@linux ~]#yumdownloader glibc.i386
```

then yum downloading 'glibc-2.5-65.i386.rpm' package

```
[root@linux ~]#rpm -Uvh --force glibc-2.5-65.i386.rpm
```

Then check i386 installation

```
[root@linux ~]# rpm -q glibc.i386
glibc-2.5-65
[root@linux ~]# rpm -q glibc.i686
package glibc.i686 is not installed
```

maybe this thread is old but this solved 4gb problem on mine.
