Yes all mine are doing the same, I also have one that shows:

	total	used	free	shared	buffers	cached
Mem:	24048	23082	965	0	2515	10861
-/+ buffers/cache:		9706	14342			
Swap:	10236	0	10236			

Which is completely wrong, as there container only has 2GB of memory. Its showing what the actual node shows.
