Yes all mine are doing the same, I also have one that shows:

```
         total     used     free   shared   buffers    cached
Mem:     24048    23082      965        0      2515     10861
-/+ buffers/cache:   9706    14342
Swap:    10236        0    10236
```

Which is completely wrong, as there container only has 2GB of memory. Its showing what the actual node shows.
