Subject: Create a template command?
Posted by webking on Wed, 22 Feb 2012 23:18:09 GMT

Hi there,

I am using hypervm and solusvm to create a template for an existing container. And I m wondering if I can do that in command line.

Let says I want to create a template for a container id 123. How would I do that in shell.

You may ask why? because I want to automate this process and make a back up.

Thanks.
