Hi,

The Debian Project (www.debian.org) is considering to remove support for OpenVZ, due to lack of maintainers.

If such future compatibility is important for OpenVZ users, please speak up.

www.linux-archive.org/debian-kernel/593583-possible-support-open-vz-also-next-version-stable.html

Ben Hutchings (from Debian kernel team) says:

Quote:As a necessary (but not sufficient) condition, you and the OpenVZ project would have to support OpenVZ in the *current* Debian stable release. The last release based on 2.6.32.y was made in March. For our OpenVZ kernel configurations we had to revert all the scheduler fixes made in 2.6.32.29 due to conflicts which we obviously do not have the necessary knowledge to resolve.

It seems to me that the OpenVZ project does not support longterm releases other than RHEL.
