Hi

On Fri, Jul 14, 2006 at 12:56:15AM +0400, Kir Kolyshkin wrote: > Where can we get the differences from "vanilla" 2.6.16 to Debian's 2.6.16?

ftp://ftp.se.debian.org/debian/pool/main/l/linux-2.6.16

The best way is to install the linux-source-2.6.16\_2.6.16-16\_all.deb pacakge, unpack the /usr/src/linux-2.6.16.tar.bz2 file, and diff the tree against the vanilla kernel.

However I think the following file in that directory give the same output: linux-2.6.16\_2.6.16-16.diff.gz

Regards,

// Ola
