Onur,

You need to start by including the modules in the host node
/etc/vz/vz.conf file iptables kernel module configuration line. Here is
a sample line:

IPv4 iptables kernel modules
IPTABLES="ipt_REJECT ipt_tos ipt_limit ipt_multiport iptable_filter
iptable_mangle ipt_TCPMSS ipt_tcpmss ipt_ttl ipt_length"

Then you need to restart vz for the changes to take effect.

Cheers,
Gary Wallis
