
Subject: "S15ssh_gen_host_keys" script not executed after creating new container

I've created a custom debian 6 template.

I've followed these instructions:

```
cat << EOF > /etc/rc2.d/S15ssh_gen_host_keys
#!/bin/sh
ssh-keygen -f /etc/ssh/ssh_host_rsa_key -t rsa -N ""
ssh-keygen -f /etc/ssh/ssh_host_dsa_key -t dsa -N ""
rm -f \[extract_itex]0
EOF
```

```
chmod a+x /etc/rc2.d/S15ssh_gen_host_keys
```

But after creating a container, the ssh keys aren't generated. The official debian 6 template has a `ssh_key_hack.sh`?
