thanks

Hi

Here is yet another bugreport that should be fixed. It is just a minor one but I think it is good to fix it anyway.

Regards,

// Ola

Package: vzctl

Version: 3.0.10-1

Severity: minor

In vz.conf(5), the descriptions of VE\_ROOT and VE\_PRIVATE say that the values of these parameters have to include the string \$VPSID. The correct string is \$VEID, not \$VPSID. At least, that's what's used in the default /etc/vz/vz.conf, which works.

-- System Information:

Debian Release: testing/unstable

APT prefers testing

APT policy: (990, 'testing'), (300, 'unstable'), (200, 'stable')

Architecture: amd64 (x86\_64)

Shell: /bin/sh linked to /bin/bash

Kernel: Linux 2.6.16

Locale: LANG=C, LC\_CTYPE=C (charmap=ANSI\_X3.4-1968)

Versions of packages vzctl depends on:

ii libc6 2.3.6-15 GNU C Library: Shared libraries

vzctl recommends no packages.

-- no debconf information
