Subject: HN using swap instead of ram Posted by Esm on Thu, 26 Apr 2012 14:53:35 GMT View Forum Message <> Reply to Message

Hi!

Today I encountered a strange behaviour. My hardware node (Debian 2.6.32-5-openvz-amd64) with 36Gb of RAM filled up its SWAP while there was enough physical RAM left, it was only using about 12Gb.

Would anyone maybe know what could have caused this?

If any more information is required then please let me know.

Thank you for your help anyway!

Kind Regards,

E. de Wolf
