
Subject: [PATCH v3 2/2] SUNRPC: move per-net operations from svc_destroy()
Posted by [Stanislav Kinsbursky](#) on Wed, 02 May 2012 12:08:45 GMT
[View Forum Message](#) <> [Reply to Message](#)

v2:

1) Increase per-net usage counted in lockd_up_net(), because of note 2.

The idea is to separate service destruction and per-net operations, because these are two different things and it's mix looks ugly.

Notes:

1) For NFS server this patch looks ugly (sorry for that). But these place will be rewritten soon during NFSd containerization.

2) LockD per-net counter increase in lockd_up() was moved prior to make_socks() to make lockd_down_net() call safe in case of error.
