Subject: Debian: recommended kernel

Hi all

We're running OpenVZ on Debian Squeeze with the kernel shipped by Debian.

Several sources recommend to use RHEL 6 stable kernel. Is it recommended to use it also on Debian stable? If so, how should it be installed? The wiki has links to rpm files only, it seems.

The reason I ask is that we're considering switching kernel, since the Debian OpenVZ kernel seems to have issues. Specifically, we suffer from the same problem as described here:

<http://lists.debian.org/debian-kernel/2011/12/msg00689.html>

Cheers

Roman
