Yet another solution is to use alien:

[http://wiki.openvz.org/Install\\_kernel\\_from\\_RPM\\_on\\_Debian\\_6.0](http://wiki.openvz.org/Install_kernel_from_RPM_on_Debian_6.0)

The bad thing about it is it's not a "native" way. The good thing is you have the same bit-by-bit binary kernel which we test a lot.
